

Mom, I Think I Wanna CHEER?

Benefits of Cheerleading:

- Your child will grow in both mental and physical strength.
- Your child will make long lasting friendships
- Your child will learn to be part of a team and be a good teammate
- Your child will develop self motivation and perseverance

What makes LA Different:

Louisiana Athletics is a child development facility that goes the extra mile to develop the whole athlete body, heart, and mind. After a few short months, you will see an improvement in your child's confidence, mental focus, and physical strength. We use cheer as a vehicle to train children to healthy young adults.

Authentic Relationships

“From our first cheer experience at 5 years old my daughter has grown to love our LA family. The friendships that she has made are those that are lasting. There is a special bond created when children work together and learn to overcome their own limitations in order to experience winning.” - Lisa Spillers
